

SIMONSEN IDEAL

HCP254TS POLY-TENDER

Are you an end user of fertilizer that needs access to product on your schedule rather than your retailer's?

Are you a retailer servicing customers that commonly need less than a full load when they call?

Simonsen-Ideal has the solution.

The HCP254TS Poly-Tender is an affordable 254 cubic-foot fertilizer tender, with up to eight-tons in capacity. It sets up in minutes on site and has a simple, gravity-fed dispensing system that's easy to use and low maintenance.

- Non-Stick, durable polymer hopper for easy cleanout and long life
- Translucent hoppers allows for viewing product level with a single glance
- Working temperature from -40 to 140 degrees Celsius
- Easy replacement of hoppers
- Lightweight powder coated frame – simple to move and tough exterior finish
- Legs swing in for legal transport
- Easily-operated stainless steel trap and slide gate
- Both forklift pockets and 12-volt electric winch provide options for raising support legs
- Full access to fill from either raised or lowered position

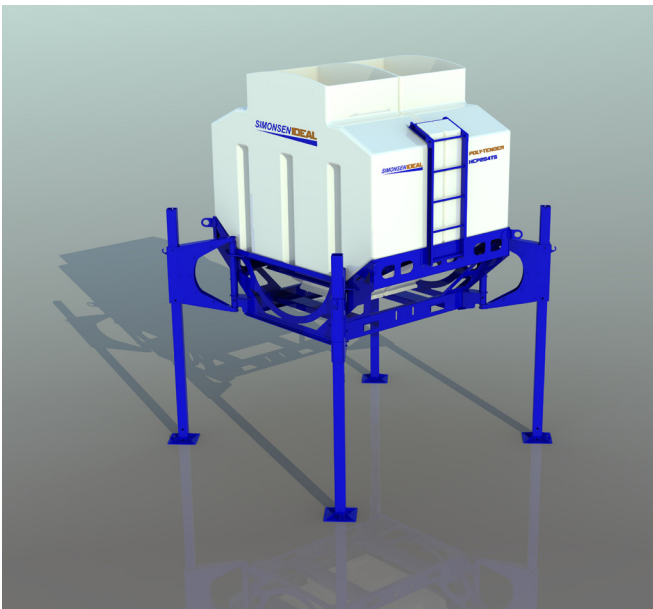

End Users – Have fertilizer on-hand when you need it.

Retailers - Haul full loads to your smaller customers.

Whichever your need – fill it with the HCP254TS from
